(54) Title: SYSTEM TO PRODUCE DRINKING WATER

WO 2005/030363 A1

(57) Abstract: A system for producing drinking water includes an air-condensing device for generating water by condensing moisture contained in air, the air condensing device being disposed in a first case, a purifying part for filtering off impurities contained in the water generated by the air condensing means, the purifying part being disposed in a second case and connected to the air condensing device through a tube, and a water supply part for supplying the water purified by the purifying part to a user. The air condensing device and the water supply part are disposed in separated sets disposed at a difference place.
